Implementation Framework

Integrated Water Resource Management Strategy

Khyber Pakhtunkhwa

Five structural levels are recommended to ensure coordinated implementation of the strategy with all the relevant departments and other actors in the province:

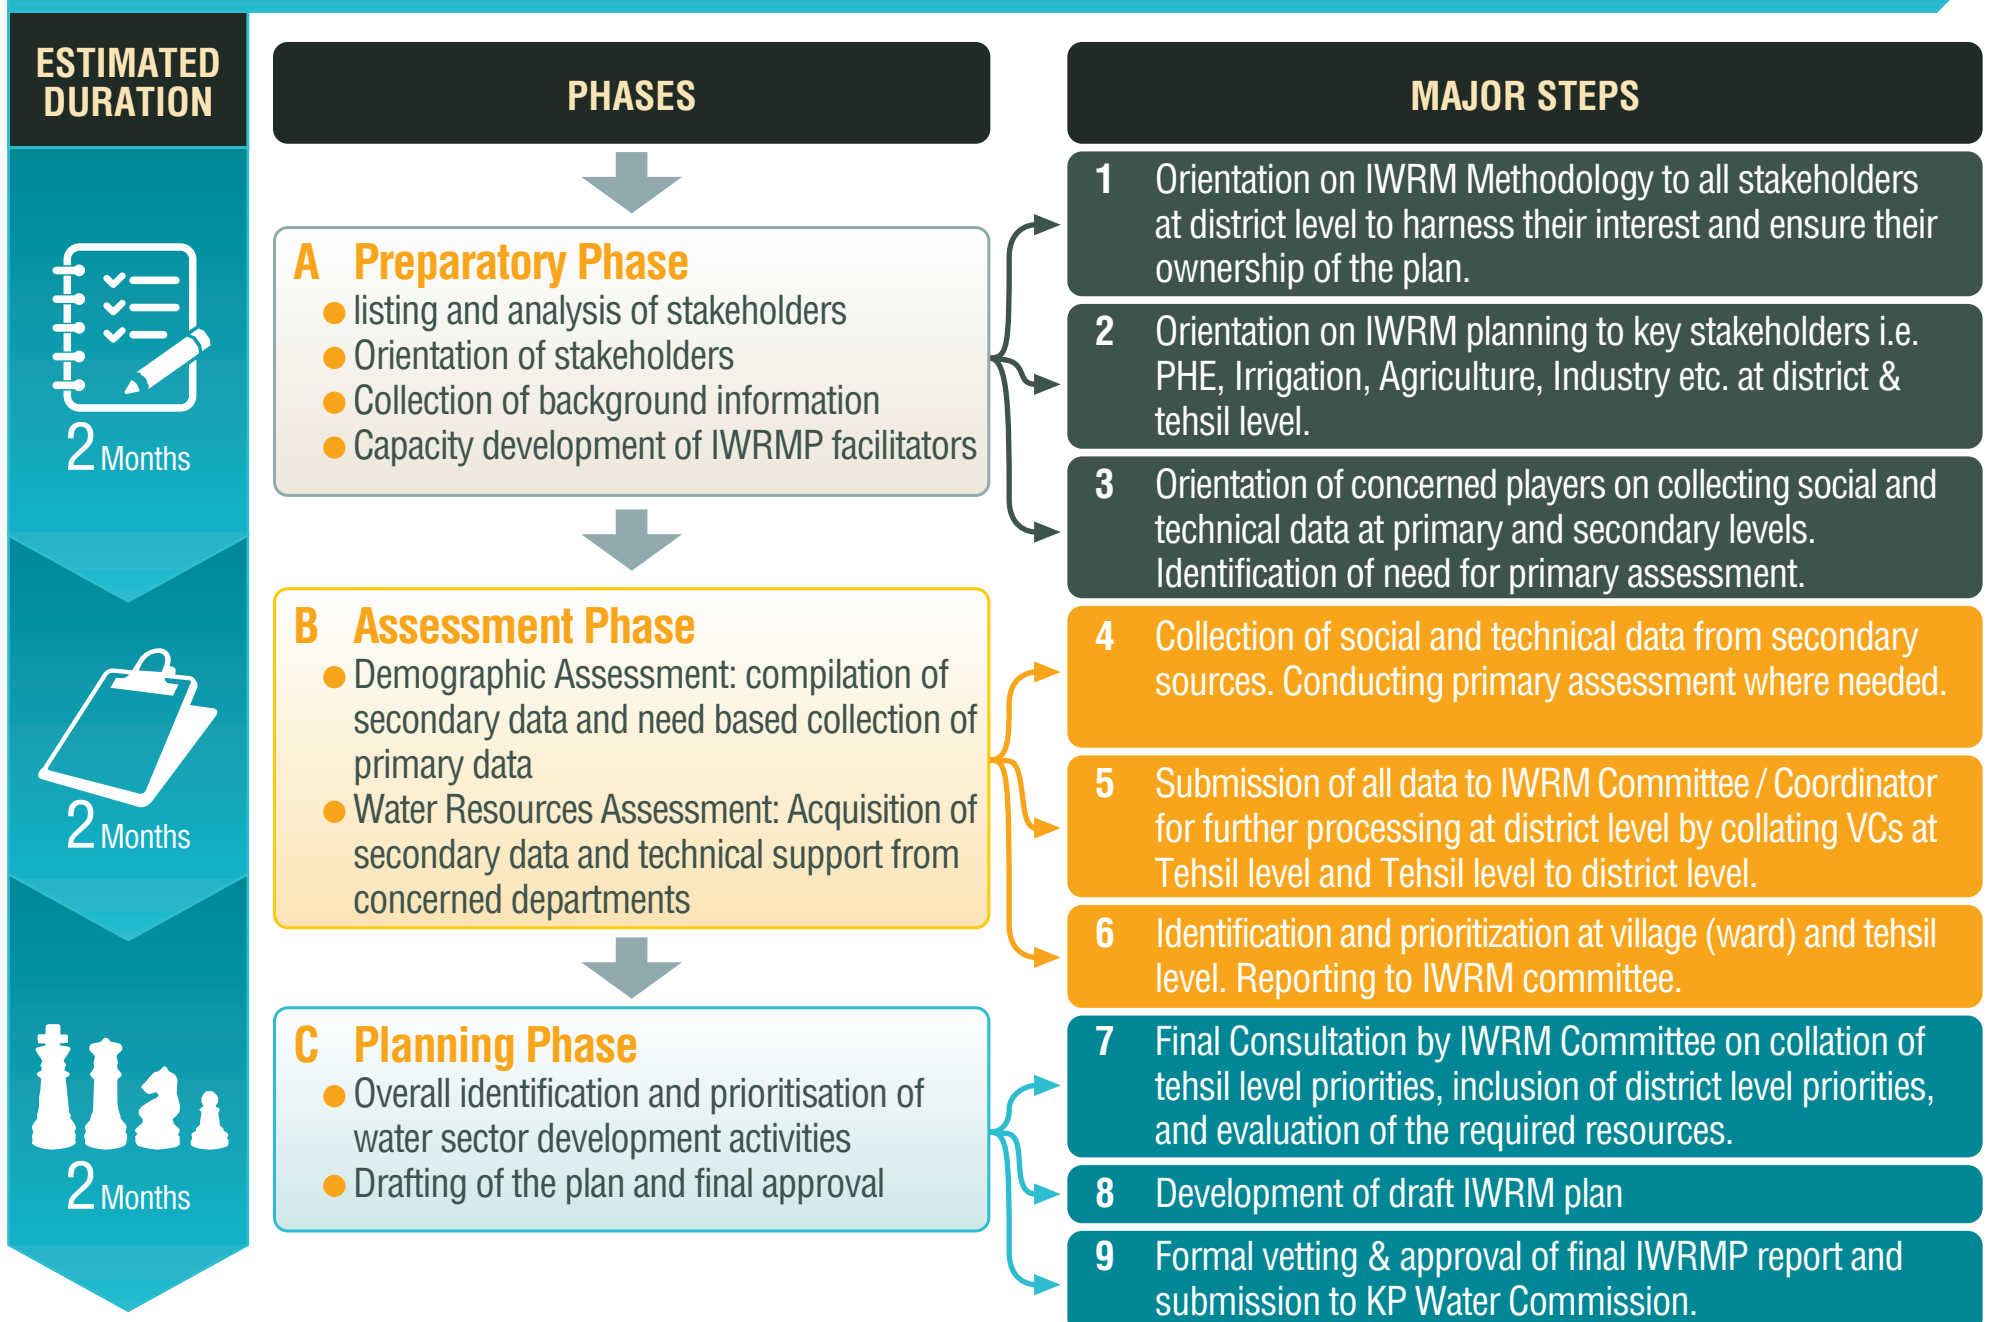

- 1 **The KP Water Council** - housed in the office of the Chief Executive of the province.
- 2 **The KP Water Commission** - housed in the Planning and Development department.
- 3 **Provincial Groundwater Authority** - an independent structure to govern groundwater.
- 4 **District IWRM Committees** to steer IWRM planning at district level and its implementation.
- 5 **District/tehsil WUAs** to integrate citizens' perspective into planning so they do their duty towards the community.

Integrated Water Resource Management (IWRM) Plans

IMPLEMENTATION METHODOLOGY AT DISTRICT LEVEL

IWRM plans devise a mechanism for **implementation and monitoring of IWRM strategy**. An IWRM **planning manual prepared and piloted** during the process of this strategy development is its integral part. It sets the **planning frame and steps for the IWRM planners**. All the devolved units will be expected to prepare their **IWRM plans within one year of its notification**. These plans will be prepared through a coordinated process with an **agreed upon methodology for all stakeholders** under the guidelines of the **IWRM Manual** in a highly participatory way.

Step-wise Process for Development of Integrated Water Resources Management Plans

District IWRM Plans will be implemented through **Annual Development Programmes (ADPs)**, and will be updated after each five years, or earlier in case of any **drastic changes in water resources** of the districts
